#sector #renovables

Exports of Spanish wind sector increased in 2014.

The Spanish wind sector exported value of 2,234 million euros in 2014, representing an increase of 57.4% over the previous year, according to provisional data from the Ministry of Economy. Since 2000, exports exceeded imports, so the balance was exporter.

Spain's bid for wind has meant the creation of a major export industry technology with high added value. The following figure shows the export balance of the Spanish wind industry in the period from 2000 to 2014 (provisional data) is displayed.

## New work at height safety Installation

Later this month of February was held a new installation of Protection Systems in height, this time inside a company dedicated to medical equipment of the Ribera Navarra.

The project involved the installation of 9 vertical lifelines, 2 horizontal and 21 anchor points. Installed in crane bridges and production presses.

The works were carried out by two **serena Safety by CONAPRO** technicians and thanks to earlier work of planning and coordinating the work was done in record time of 3 days.

## We were there...

The Auditorium of Museum University of Navarra #MUN attending the Forum and Economics "solid foundation for growth" with the presence of Minister Luis de Guindos and organized by Diario de Navarra and Banco Santander Spain.
