Spain, the second country in continental EU more weight in its wind and solar electricity

Our country is only behind Portugal, the percentage of these two 'green' energy was raised to 25.3%.

Spain is the second country in mainland Europe with a greater weight of wind and solar generation on its total electricity production, reaching a rate of 24%, as shown in the annual report 2014 on the Spanish electricity system developed by Red Power of Spain (REE).

The report shows that Spain produced 51 terawatt hours (TWh) of wind power in 2014 and another 13.1 TWh of solar, which, added, equivalent to 24% of the 266.9 TWh of total electricity production. This percentage surpasses only Portugal, whose 11.8 TWh and 0.6 TWh of wind solar equivalent to 25.3% of total production of 49 TWh.

Germany is the country that produces more wind and solar, with 55.2 TWh and 34.8 TWh, respectively, but this volume has a weight of 16.4% compared to its total generation, which amounts to 548 TWh and doubles the registered in Spain.

NEW QUALITY CERTIFICATE FOR OUR CUSTOMERS.

Inerzia Group, following a thorough audit of the Global Platform Certification Suppliers, ACHILLES, got the REPRO seal. The advantages this certification offers our customers:

- We certify as providers that offer guarantees of compliance with the main legal and regulatory requirements.
- It provides proven references.
- Details the products and services we offer, as well as its scope.

The REPRO seal joins a long list of certifications that guarantee us as a consolidated business group that is committed to the market and its customers betting every day for excellence.

IN ANNUAL RE_CERTIFICATION QUALITY, ENVIROMENT, H&S.

A year Inerzia Group companies have successfully passed the audits of the Quality Management System, Environmental and Occupational Risk Prevention. These audits, based on international standards UNE reach, ratify maintaining our ISO 9001, ISO 14001 and OHSAS 18001 certificates.

For over 10 years we have worked on a model of management that integrates these three areas and since 2014 we also have the certification that enables us GWO as "Center for Basic Safety Training" for the wind sector (Modules Working at Heights, first Aid, Cargo Handling, Fire Fighting).

This new certification GWO has also been the subject of future audits. Finally, the Group companies have realized the Legal Audit Joint Prevention Service.
