WHAT'S GWO?

The Global Wind Organisation (GWO) is an association of Wind Turbine owners and manufacturers with the aim of supporting an injury-free work environment in the wind industry.

This Standard has been developed in response to the demand for recognisable Basic Safety Training (BST) in the industry. The development of this Standard has been prepared in co-operation between the members of GWO. This work is based on risk assessments and factual incident/accident statistics within the industry pertaining to the installation, service and maintenance of wind turbine generators.

The objective of this Standard is to develop common industry training and best practise Standards for health and safety as a vital and necessary way forward to reducing risks for personnel in the wind industry working on site and to reducing environmental risks across Europe and the globe.

This Standard describes the requirements for Basic Safety Training in the wind industry that are recommended by GWO. Where national legislation sets higher requirements for the training, the Training Provider shall incorporate these requirements in the training programme.

GWO recommends a company specific Basic Safety Introduction and Technical Safety Training as additional training.

CONAPRO

CERTIFICADOS EN

With the main objective to continue to offer our customers a formation in height and the highest level accreditations with leading market .

SGS (Accredited Certification Entity) has certified this training activity of CONAPRO SL. under the Standard Security Training for the Wind Energy Sector established by the GWO (Global Wind Organization) and accepted by the wind as Single Sector Legislation governing the need for basic training .

This range consists of 5 modules , of which the main CONAPRO been taught 4 while we are working on the approval process of the 5th (Offshore) as a commitment to continuous improvement :

MÓDULOS WE TEACH:

FIRST AID:

Target Group:

Staff that works with wind turbine erection, maintenance and repair.

Approval:

GWO

Valid Period:

2 years.

Admission requirements:

Medical Self Assessment.

Goal:

The aim of the module is to administer safe an effective First Aid in the Wind Turbine Industry in accordance with GWO through teorical and practical training.

Duration:

16 Hours.

MANUAL HANDLING:

Target Group:

Staff that works with wind turbine erection, maintenance and repair.

Approval:

GWO

Valid Period:

2 years.

Admission requirements:

Medical Self Assessment.

Goal:

The aims of this module a to give the participants the awareness through teorical and practical training the encourage positive manual handling behavior and perform manual hadling activities in a safe manner.

Duration:

4 Hours.

FIRE AWARENESS:

Target Group:

Staff that works with wind turbine erection, maintenance and repair.

Approval: GWO**Valid Period:** 2 years.**Admission requirements:**

Medical Self Assessment.

Goal:

The aim of the module is to give the participants the basic knowledge and skills through teorical and practical training to prevent fires, make initial and appropriate judgment when evaluating a fire, manage evacuation of personnel to ensure all are safely evacuate and accounted for in the event of an unmanageable fire.

Duration: 4 Hours.

WORKING AT HEIGHT:

Target Group:

Staff that works with wind turbine erection, maintenance and repair.

Approval: GWO**Valid Period:** 2 years.**Admission requirements:**

Medical Self Assessment.

Goal:

The aims of the modules is to give the participants the necessary basic knowledge and skills through teorical and practical training to use basics PPE and perform safe work at heights and safe and comprehensive basic rescue from heights in a remote wind turbine enviroment in accordance with BST module Working at Heighth.

Duration: 16 Hours.
