

GRUPO INERZIA

it's life, it's pure Inerzia

Newsletter
January 2013

For the first time in history, **wind has been the primary source of electricity in Spain** for a full quarter. From 1 November to 31 January, has generated 16,410 GWh, 36% more than the same period last year, according to provisional data from Spain's Red Eléctrica (REE). This production is enough to supply 26% of mainland electricity demand in a quarter, according to estimates by the Association (AEE).

The wind contribution has helped put the average price of electricity in the market at 50 euros per MWh (1.1% less than in January 2012) despite the new tax that the Government has introduced.

The last three months, the wind has been the primary source of electricity generation in Spain. **Has contributed 23.5% of demand**, ahead of nuclear energy (19.4%), the thermal coal (15.8%) or combined cycle gas (12.1%).

With renewable energy (accounting for 44.3%), CO2 emissions from the electricity sector have been reduced by 58.5% in January compared to 2012 (5.4 million tonnes).

The strong campaign being run from various sectors to discredit renewable energy collides with some evidence demonstrating its indisputable contribution to the Spanish energy system.

With the new year, we consolidated our **new look**. Starting now, we will use it for any type of communication both **Inerzia Group**, members and businesses: **NEM, CONAPRO** and **SERENA**. In case you still are not familiar with them, here they are.

NEM

CONAPRO

serena

Also new this year is creating a **YOUTUBE CHANNEL OF INERZIA GROUP**

(www.youtube.com/inerziagrupo). The reason for

its creation, is to put at your disposal, for example, to videos on proper use of Liftevac (product marketed by Conapro), or held demonstrations at fairs or other events in which he participated Group Inerzia, etc.

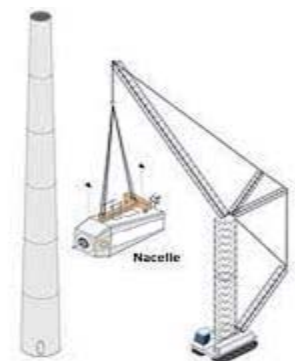

CONAPRO

continue to work to provide better service to our customers. Therefore, we have implemented a tool to immediately obtain certificates of workers. Creating a **"CUSTOMER AREA"** within the company's website (www.conaprosl.com).

The main function of this area is to facilitate access to licenses, whether for training or review of EPI's, all employees of the company, at any time and from anywhere.

NEM

protagonist in the **assembly process** of the new turbine AW125/3000 ACCIONA presented at EWEA 2013 with **LIFTING AND USEFUL ITEMS BRAND NEM**: Slings, Rack's Support mounting, Lifting Nacelle Beam ...
